### Philips UltinonSport LED for Fog and Powersports

**Get ready for your next adventure with Philips UltinonSport LED bulbs.**

The perfect upgrade from halogen to LED technology, these bulbs were engineered to deliver durable, long-lasting performance in the toughest Powersports applications. UltinonSport LEDs let you spot obstacles faster, to keep you safer and drive with more confidence even in the most difficult terrain.

**Perfect for snowmobiles, ATVs, and UTVs,** UltinonSport LEDs feature powerful Automotive Grade SMD LED chips with a color temperature of up to 6000 Kelvin. In fog light applications UltinonSport LED bulbs light up the road to enhance your nighttime vision. Take your lighting to the next level with the power and style of Philips UltinonSport LEDs.

Includes a pack of 2 LED bulbs

# Philips UltinonSport LED for Fog and Powersports

New **UltinonSport LED for Fog and Powersports** is the perfect bulb upgrade from halogen to LED technology, offering a durable, long-lasting performance and a powerful, cool white light of up to 6000 K color temperature.

A one-piece design, with electronics integrated into the bulb body, for quick and easy installation.

## Powerful LED performance

- Automotive grade SMD LED chips
- High luminance, ensures consistent light output in front of the vehicle
- Homogeneous beam, lets you see more clearly without blinding other drivers

## Long-lasting performance and durability

- AirCool technology: active cooling combined with an aluminum heat sink that diverts heat away from the light's critical components.
- Up to 2000 hours lifetime
- Compact design for easy installation
- **Direct replacement for** 9003, 9005/9006, 9007, 9008, 9145, H1, H3, H7, H9, H11, H8/H16, and PS24WFF halogen bulbs

*Air Cooling Technology:  
Active cooling and heat  
dissipation*

Up to  
**6000 K**  
white light

Philips UltinonSport LED

Standard halogen

**Troubleshooting tip:** Some vehicle CANbus systems have specific challenges with LED-based retrofit bulbs. They see the lower power consumption of LED bulbs as a sign of a burned-out bulb, which can cause dashboard warnings, high beam indications, or LED flickering.

Installing a Philips LED CANbus adapter is the ideal supplement for LED light bulbs. These unique Philips CANbus adapters ensure smooth functioning for any electrical issues. The adapter's waterproof connectors provide optimal performance in all conditions. Installation is easy and takes only minutes.
